

## APPENDIX A: How To Identify The Type eBeam Edge BT Receiver

You can identify the type of Edge Bluetooth Receiver based on the Revision Level and Date Code, both of which are found on the serial number label on the back of the Edge BT receiver. A sample label is shown below.

As shown, the date code is embedded in the serial number. The date code consists of the week (WW) and the year (YY). The revision level is appended to the Asm P/N, meaning that when the stock code 46001850 is revised to rev. B, the Asm P/N will be shown as "46001850B".

### Updated Date code and Revision Codes for Bluetooth Receivers

Part Number	Description	Date Code on Label	Revision on Label
46001850	Edge Education BT Receiver HID	0110 to 1212	None
46002445	Edge Business BT Receiver HID	0110 to 1212	None
46001850	Edge Education BT Receiver SPP	1312 or later	46001850B
46002445	Edge Business BT Receiver SPP	1312 or later	46002445B
